

Wonders...

This exciting 3 part series takes a look at the wonders all around us in the form of the planet we live on, the animals who share it with us and our very own bodies and lives. *Wonders of Gods Creation* - 3 x 60 Minutes

Planet Earth

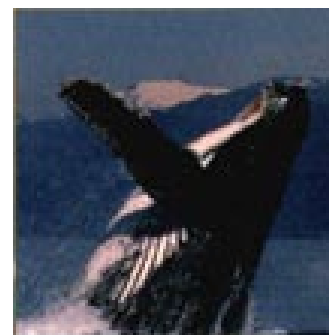

Available in English, Russian

Since the beginning of time its very existence has endured as a mystery to those who dwell upon it. What is it that makes life possible on the blue planet? Explores the important role of water, the earth's atmosphere, vegetation

Animal Kingdom

Available in English, Russian

More than a million different species of living organisms are known to inhabit the earth. Nearly 70% are animals. Watch the wonder of a salmon's homing device, watch an otter use a tool and discover the secrets of flight.

Human Life

Available in English, Russian

It is perhaps the greatest wonder of all. Our bodies are incredibly complicated. The 206 bones of the human skeletal system keeps it all together and have been made to move. The human hand with incredible dexterity, the circulatory system - even take a trip inside the human heart!
